

Analog Devices Strengthens Capacity and Resiliency Through Expanded Partnership with TSMC

February 22, 2024 at 8:00 AM EST

Special arrangement through JASM secures ADI's long-term chip supply and focuses on 40nm and finer process technology nodes

WILMINGTON, Mass., Feb. 22, 2024 /PRNewswire/ -- [Analog Devices, Inc.](#) (Nasdaq: [ADI](#)) announced today that the company has made a special arrangement with TSMC, the world's leading dedicated semiconductor foundry, to supply long-term wafer capacity through Japan Advanced Semiconductor Manufacturing, Inc. ("JASM"), TSMC's majority-owned manufacturing subsidiary in Kumamoto Prefecture, Japan.

Building on ADI's more than 30-year partnership with TSMC, this adds another option for ADI to secure additional capacity of fine-pitch technology nodes to serve critical platforms across its business, including wireless BMS (wBMS) and Gigabit Multimedia Serial Link (GMSL™) applications. The joint efforts reinforce ADI's resilient hybrid manufacturing network, which helps to insulate external factors while supporting the means to increase output and scale rapidly to meet customer needs.

"Our hybrid manufacturing network helps deliver a competitive edge to our customers. Together with TSMC, we can serve our customers with more resilient supplies, respond even more rapidly to customer needs and changing market conditions, and focus our investments on innovative manufacturing solutions that benefit society and the planet," said Vivek Jain, Executive Vice President of Global Operations & Technology at ADI.

"Today's announcement demonstrates TSMC's commitment to helping our customers meet their long-term capacity needs," said Sajiv Dalal, Executive Vice President of Business Development at TSMC North America. "We're delighted to expand our ongoing collaboration with ADI that will help to ensure a steadfast and dynamic journey of semiconductor innovation with robust manufacturing capabilities."

About Analog Devices, Inc.

Analog Devices, Inc. (NASDAQ: [ADI](#)) is a global semiconductor leader that bridges the physical and digital worlds to enable breakthroughs at the Intelligent Edge. ADI combines analog, digital, and software technologies into solutions that help drive advancements in digitized factories, mobility, and digital healthcare, combat climate change, and reliably connect humans and the world. With revenue of more than \$12 billion in FY23 and approximately 26,000 people globally working alongside 125,000 global customers, ADI ensures today's innovators stay Ahead of What's Possible. Forward-Looking Statements

This press release contains forward-looking statements, which address a variety of subjects including, for example, our statements regarding our long-term wafer capacity supply arrangement with TSMC and JASM; our hybrid manufacturing network; and other future events. Statements that are not historical facts, including statements about our beliefs, plans and expectations, are forward-looking statements. Such statements are based on our current expectations and are subject to a number of factors and uncertainties, which could cause actual results to differ materially from those described in the forward-looking statements. The following important factors and uncertainties, among others, could cause actual results to differ materially from those described in these forward-looking statements: economic, political, legal and regulatory uncertainty or conflicts; changes in demand for semiconductor products; manufacturing delays, product and raw materials availability and supply chain disruptions; products that may be diverted from our authorized distribution channels; changes in export classifications, import and export regulations or duties and tariffs; our development of technologies and research and development investments; our future liquidity, capital needs and capital expenditures; our ability to compete successfully in the markets in which we operate; and security breaches or other cyber incidents. For additional information about factors that could cause actual results to differ materially from those described in the forward-looking statements, please refer to our filings with the Securities and Exchange Commission, including the risk factors contained in our most recent Annual Report on Form 10-K. Forward-looking statements represent management's current expectations and are inherently uncertain. Except as required by law, we do not undertake any obligation to update forward-looking statements made by us to reflect subsequent events or circumstances.
